Connor Freeman
Web Developer

connormfreeman@gmail.com — (817) 798-8935

For the past year I've worked with national organizations and individuals as a freelance web developer and consultant, with a consistent record of on-time and on-budget projects. Looking to work where I can bring immediate value, preferably with a team that values security, usability, strategy, and finds enjoyment in building a great product.

Job Experience

Freelance (http://connorfreeman.com)

Web developer and consultant April 15, 2015 - Present

My work has covered a variety of projects and services, including consulting with individuals starting an eCommerce business, to working with internal teams at advertising and design agencies. I excel at bridging the gap between design, development, and business strategy. My understanding of business goals facilitates successful work.

Highlights:

- Working on national clients such as Icy Hot, Gold Bond and Rolaids.
- Setting goals, budgets, timelines, and maintaining client relationships.
- Collaborating with internal teams at agencies and consulting on responsive design, strategy, and development.

Skills:

Project management   Interpersonal communication   Negotiation

Mixed Media Creations (http://mixedmediacreations.com)

Web Developer April 1, 2014 - April 15, 2015

I worked with a team of developers, designers, and account managers to build custom websites for multi-family real estate apartment properties all over the world. My job included collaborating with designers to create responsive websites that connect with backend databases to show current apartment listings for prospective renters. I also helped develop and manage an agile workflow to delegate tasks, and assign code review for the other developers on the team.

Highlights:

- Developed an in-house build-system using Composer, comprised of a custom WordPress application, reusable templates, gulp task runner, and deploy process.
- Helped increase productivity with code reuse and streamlined on-boarding of new team members.
- Built interactive maps using Google Maps API to highlight businesses nearby an apartment location.
- Created interactive floor plans for apartments with pricing details from an availability API.

Skills:

Angular   AJAX   Google Maps API   Static site generators   Composer
Roots WordPress Framework   Object Oriented JS

QuickSilver Interactive Group (http://qsigroup.com)

Web Developer   May 22, 2011 – April 1, 2014

Starting as a summer intern, I helped manage dozens of applications on both frontend and backend. I was invited to return the following summer as a developer to work on projects of my own.

Highlights:

- Front-end developer for Ruby on Rails application
- Developed Facebook store locator application
- Maintain client inventory databases in PostgreSQL and MySQL

Skills:

HTML5   CSS3   jQuery   Zend Framework   Ruby on Rails   WordPress   Drupal

Professional Development Institute (http://pdi.org)

Web Master   February 18, 2012 – April 1, 2014

I worked part-time during school to manage the website and internal services. Part of my job was creating new calendar events for their conferences, I did this by automation testing with Selenium. This dramatically reduced time and cost for the business. It gave me free time to build internal services like a purchase order tracking system.

Highlights:

- Managed Drupal website.
- Automated testing with Selenium.
- Created custom Microsoft Access application.

Education:

University of North Texas

B.S. — Computer Science
Earned 92 credits of Bachelor of Science degree

Courses:

Computing Foundations   Digital Circuits & Analysis   Algorithms

Udacity

Online — Programming

Courses:

Computer Science   Object Oriented Javascript   JavaScript Patterns

---

Skills:

Project Management

Strategy   Organization
Workflows   Agile

Programming

VCS   MVC   REST   CRUD
OOP   FP

Front End Development

HTML   Template engines   CSS
Javascript

Backend Development

Unix   Apache   nginx
Ansible   Vagrant   PHP
Node
